STEM Research and Career Symposium
March 26 – 28, 2014
Emory Conference Center

In collaboration with Emory College, Emory School of Medicine — Office of Postdoctoral Education, Rollins School of Public Health and the Emory University Office of the Provost.

Participants include the Graduate Division of Biological and Biomedical Sciences, the MD/PhD Medical Scientist Training Program, Public Health Sciences and the programs of Chemistry, Mathematics and Computer Science, Nursing, Physics and Psychology.
The symposium brings undergraduates, graduate students and faculty advisors to Emory for presentations, networking, mentoring, and recruitment.

Convened and organized by Laney Graduate School, the goal of the symposium is to bring faculty advisors and their students to the Emory campus for two days of shared research presentations and for networking, mentoring, and recruitment. Participants will include outstanding undergraduates intending to pursue the PhD or MD/PhD degree and graduate students seeking postdoctoral opportunities. Faculty Advisors are also encouraged to attend and learn about the opportunities Emory offers.

Students are required to submit abstracts of their research for review by a selection committee of Emory training faculty from science, technology, engineering and mathematics (STEM)-related programs, including those doctoral programs that align with the MD/PhD program. Ten students will be selected to give oral presentations and all others will present their research in a poster session.

There will be ample opportunity to meet with faculty and students of the participating programs, including training grant programs. Breakout sessions will cover topics relevant to students at this stage of their career and advisors of such students.

Trainees from diverse backgrounds (to include ethnicity, race, economic status, disability, educational experience, first generation status, and in some cases, gender) can apply for diversity travel awards that will provide for travel and housing for the student and possibly her/his advisor.

We encourage underrepresented minority students, students with disabilities, and economically disadvantaged students who are pursuing a career in STEM disciplines to apply.

Apply to Attend

→ Visit gs.emory.edu/STEM to apply

→ You will be asked to submit an abstract, CV and one recommendation from a program or research advisor

→ The application deadline is January 7; students who wish to apply for travel awards must also do so by January 7

→ Applicants will be notified of decisions by February 7

Here’s what some of last year’s participants had to say:

“...a very helpful and motivating experience for prospective researchers.”

“It honestly gave me confidence in myself as a scientist that I had never felt before.”

“...transformed my perception of myself as a scientist.”

“It felt like each student, undergraduate and graduate alike, was an individual that Emory truly cared about and not a number.”

Emory and Atlanta

The Emory campus is located six miles northeast of downtown Atlanta. The ninth largest U.S. metropolitan area, Atlanta is home to state government, regional centers of the U.S. government, and numerous corporations and organizations like the American Cancer Society, the U.S. Centers for Disease Control and Prevention, the King Center, The Carter Center, CNN and Coca-Cola. It is also a major center for higher education, which includes Emory, the Georgia Institute of Technology, Georgia State University and 16 other colleges and universities.
